

Gamgee and QuantWiFi announce strategic partnership that delivers managed Wi-Fi performance, remote monitoring for operators and unparalleled smart home Wi-fi experience for internet users.

3 June 2020 - Amsterdam, The Netherlands

[QuantWifi](#) and [Gamgee](#) today announced a strategic partnership that will deliver best in class **Wi-Fi monitoring technologies** with a combined, engaging and consumer-focused **smart home Wi-Fi management solution**. This partnership delivers a service that will provide internet users at home with reliable and hassle-free management solution for their smart home whilst offering broadband service providers a real-time, transparent and quantifiable insight into the in-home Wi-Fi quality and performance.

“What we see on the market is a growing number of connected devices at home as well as intensifying pressure on the broadband and Wi-Fi network performance,” states the CEO of Gamgee, Paul Hendriks. “connecting your laptop or mobile phone to your router is no longer sufficient. Consumers demand an automatic, integrated and simple solution that will give them full control over connected users and devices, monitoring and maintaining the Wi-Fi quality while securing a safe network environment for everyone at home.”

The CEO of QuantWiFi Ali Sayinta further adds: “Broadband service providers are facing a challenging situation where growing number of users continuously add more and more devices to an already overloaded in-Home Wi-Fi network which leads to increased traffic for customer support, often unnecessary truck-rolls, time-consuming customer visits and escalating support costs. Thanks to our solution, Wi-Fi performance bottlenecks are easily and precisely identified, and resolved in real-time.”

Both companies express a strong belief that by combining their services, they bring an unprecedented value to consumers and broadband operators world. A world that relies more and more on stable Wi-Fi connections and a plethora of smart home devices.

About [QuantWifi](#)

QuantWiFi develops game-changing remote and live Wi-Fi monitoring technologies, which stand to transform how Internet-bound services and products are marketed and supported at home. QuantWiFi's solution makes in-home Wi-Fi quality visible to broadband service providers, identifying Wi-Fi performance bottlenecks and delivering a quick and effective resolution. This insight offers customer care, operations and marketing a clear path to achieving better quality Wi-Fi in each and every home while removing the need for costly truck rolls and time-consuming customer visits.

About [Gamgee](#)

Gamgee is an innovative, hardware-independent provider of smart home and Wi-Fi management solutions developed to enhance the digital experience of users at home. Their solution brings broadband service providers an unprecedented level of customer satisfaction and loyalty, decrease support costs, and opens up new revenue opportunities. Gamgee offers its services worldwide.
